NEWTON

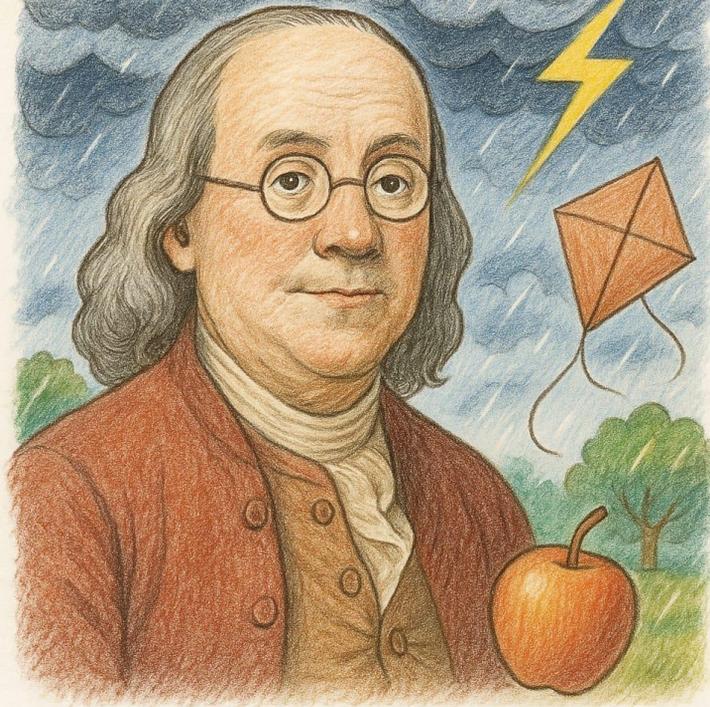

Théorise la gravité

A portrait of Galileo Galilei, an elderly man with a long white beard, wearing a dark brown robe with a white collar. He is holding a golden telescope mounted on a tripod. The background is a dark blue sky with stars, a ringed planet (Saturn), and a large orange planet (Jupiter). The portrait is framed by a complex, steampunk-style mechanical structure made of brass and copper, featuring gears, bolts, and a lens-like component at the top center.

Galilée

Il a découvert les
satellites de Jupiter
